Our R&D team has invested years of careful testing and design refinement to bring you the first commercially available mobile zip line (multiple patents-pending).

The ride is easily accessible by staircase which meets OSHA and ASTM requirements. At the top of the stairs the rider is protected from fall exposure until they are safely connected to the zip line. The rider is able to step off the platform only after the operator moves the Rotating Safety Gate to the open position.

We have developed a patent-pending device called the Auto-Retract[®] that slows only the last portion of the ride. It is a mechanized device that replaces the old method of stopping zip line riders by hand. It also returns the trolley to the top of the zip line, hence the name "Auto-Retract[®]." This innovative brake technology solves one of the most dangerous aspects of zip lines – the stop.

The Mobile Zip Line is easy to setup. Our 12 volt hydraulic lift system stands the tower into place at the touch of a button. Zip lines are secured to vehicles and the inflatable walls are positioned as backup stop devices. Setup time is around 30 minutes.

- ZIP LINE**
- 165' x 25' (50m x 7.5m) Footprint
 - 135' x 5/16" (41m x 8mm) Zip Cables
 - 5/16" (8mm) Brake Lines
 - 2 Auto-Retract[®] Braking Devices
 - 2 Trolleys with Handles
 - 7 Full-body Harnesses
 - 2 Rider Tethers
 - 1 Operator Tether
 - 2 Inflatable Backstops
(Blowers Sold Separately)

- TOWER**
- 28' (8.5m) Height
 - Entrance Gate
 - 30" (.75m) Wide Stairs
 - Non-slip, Galvanized Treads
 - 42" (106cm) Tall Stair Railing
 - Rotating Safety Gate
 - 4 Tower Flags

- TRAILER**
- 2-5/16" Bumper Pull Ball Hitch
 - 7-Prong Electrical Plug
 - 2 6000 lbs Torsion Axles
 - Electric Brakes
 - 16" 6-Lug, Load Rated Tires
 - 12 Volt Hydraulic Lift System
 - 4 Stabilizing Outrigger Jacks
 - Durable Powder Coat Finish
 - 1 Diamond Plate Chrome Tool Box
 - Wheel Lock Set
 - 6500 lbs Overall Weight

Convenient stair access with non-slip, galvanized treads and 42" (106cm) high handrail.

Rotating Safety Gates eliminate fall exposure until riders are securely attached.

Once riders are securely attached, the operator opens the Rotating Safety Gate and riders take the leap of faith.

The innovative Auto-Retract[™] stops riders inches before they hit the inflatable backstop.
